“The International Student Company Festival held in Riga, Latvia was an eye-opener. It helped us build and widen our network and become more aware of different competitors and their strategies. It made us realise that winning isn’t everything. We came out of this experience with motivation to keep improving and not give up.”

“The JA Europe Enterprise Challenge 2015 in Lisbon was a great experience for Bearn. Being surrounded by like-minded and goal-driven entrepreneurs encouraged us to strive towards creating a better company. We learnt a great deal from our judges, who provided us with useful feedback that will help us to improve our product.”

We are getting a thorough insight of how to build up and manage an organisation. Start-Up Camp Berlin 2017 widened our contacts and also exposed us to more ideas and feedback. We look forward for the final stages of the programme & whatever the result, it will surely be a learning curve for us all.
